

Roman Numerals

Name _____

Score _____

RMS:04

Example Roman numerals to Arabic numbers

If a smaller Roman numeral comes after a larger roman numeral, you will add.
Otherwise, you will subtract.

$$\begin{aligned} \text{LXII} &= 50 + 10 + 1 + 1 \\ &= \mathbf{62} \end{aligned}$$

$$\begin{aligned} \text{XLII} &= 50 - 10 + 1 + 1 \\ &= \mathbf{42} \end{aligned}$$

1) XII =

2) ⁻XLI =

3) CCLV =

4) CI =

5) XCIX =

6) LVII =

7) LXXIV =

8) XXXIX =

9) LXII =

10) XL =

11) XXXV =

12) CXXXV =

13) C =

14) LXXXVI =

Answer key

RMS:04

Example Roman numerals to Arabic numbers

If a smaller Roman numeral comes after a larger roman numeral, you will add.
Otherwise, you will subtract.

$$\begin{aligned}\text{LXII} &= 50 + 10 + 1 + 1 \\ &= \mathbf{62}\end{aligned}$$

$$\begin{aligned}\text{XLII} &= 50 - 10 + 1 + 1 \\ &= \mathbf{42}\end{aligned}$$

1) XII = **12**

2) ⁻XLI = **41**

3) CCLV = **255**

4) CI = **101**

5) XCIX = **99**

6) LVII = **57**

7) LXXIV = **74**

8) XXXIX = **39**

9) LXII = **62**

10) XL = **40**

11) XXXV = **35**

12) CXXXV = **135**

13) C = **100**

14) LXXXVI = **86**
