

Name _____

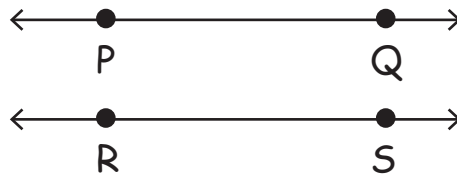

Date _____

Point, Line, Line Segment Ray, Plane

GSL03

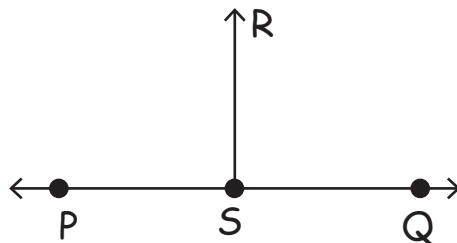

Parallel lines

Lines that lie in the same plane such that the distance between them are equidistant at any given point are called parallel lines.

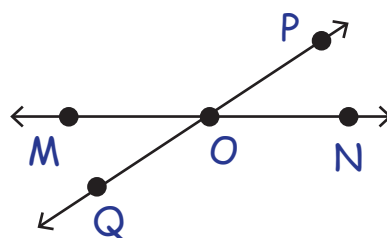

Perpendicular lines

Lines which meet each other at right angles are called perpendicular lines.

Intersecting lines

Two lines which pass through the same point are called intersecting lines.

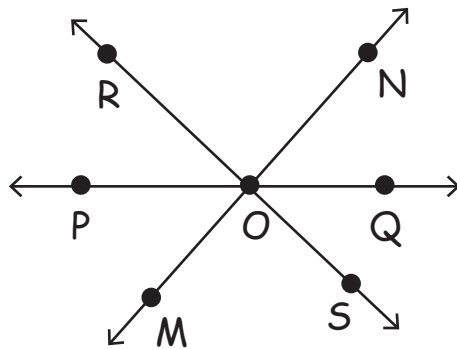

Point, Line, Line Segment Ray, Plane

Name _____

Date _____

Concurrent lines

Three or more lines which pass through the same point are called concurrent lines.

The point through which the line pass is called the point of concurrence.
