

FRACTIONS

Name _____

Score _____

1)

a) The fraction that represents pink color =

b) The fraction that represents yellow color =

c) The fraction that represents green color =

2)

a) The fraction that represents orange color =

b) The fraction that represents red color =

c) The fraction that represents pink color =

3)

a) The fraction that represents brown color =

b) The fraction that represents purple color =

c) The fraction that represents blue color =

FRACTIONS

Name _____

Score _____

Answer key

1)

a) The fraction that represents pink color = $\frac{4}{15}$

b) The fraction that represents yellow color = $\frac{6}{15}$

c) The fraction that represents green color = $\frac{5}{15}$

2)

a) The fraction that represents orange color = $\frac{2}{7}$

b) The fraction that represents red color = $\frac{3}{7}$

c) The fraction that represents pink color = $\frac{2}{7}$

3)

a) The fraction that represents brown color = $\frac{2}{8}$

b) The fraction that represents purple color = $\frac{4}{8}$

c) The fraction that represents blue color = $\frac{2}{8}$
