## Answer key

1)

a) The fraction that represents brown color =

$\frac{5}{9}$

b) The fraction that represents orange color =

$\frac{1}{9}$

c) The fraction that represents red color =

$\frac{3}{9}$

2)

a) The fraction that represents blue color =

$\frac{1}{4}$

b) The fraction that represents green color =

$\frac{2}{4}$

c) The fraction that represents purple color =

$\frac{1}{4}$

3)

a) The fraction that represents orange color =

$\frac{5}{10}$

b) The fraction that represents pink color =

$\frac{3}{10}$

c) The fraction that represents yellow color =

$\frac{2}{10}$
