$\qquad$
$\qquad$

Answer the following.

1) What is the difference in temperature between thermometer $A$ and $B$ ?
$\qquad$
2) What temperature should be raised to reach $55^{\circ} \mathrm{F}$ in thermometer C ?
$\qquad$
3) Record the temperatures from the least to greatest.
4) What is the final temperature of thermometer $B$ if there is a fall in temperature by $9^{\circ} \mathrm{F}$ ?
$\qquad$
$\qquad$

## Answer key

Answer the following.

1) What is the difference in temperature between thermometer $A$ and $B$ ? $30^{\circ} \mathrm{F}$
2) What temperature should be raised to reach $55^{\circ} \mathrm{F}$ in thermometer C ?

$$
6^{\circ} \mathrm{F}
$$

3) Record the temperatures from the least to greatest.
$\qquad$
4) What is the final temperature of thermometer $B$ if there is a fall in temperature by $9^{\circ} \mathrm{F}$ ?
$26^{\circ} \mathrm{F}$
