

EQUIVALENT FRACTIONS CHARTS

Name _____

Equivalent fractions are different fractions that show the same value.

For example: $1/2 = 2/4 = 3/6$

How it works:

Multiply or divide both the numerator and denominator by the same number.

$$1/2 \times 2/2 = 2/4$$

$$1/2 \times 3/3 = 3/6$$

Real-Life Example:

If you take half a pizza,

1 out of 2 slices = $1/2$

2 out of 4 slices = $2/4$

Both are equal!
