## Answer Key

### Practice dividing fractions using fun shopping situations!

A bakery has 3 kg of flour. Each cake needs  $\frac{3}{4}$  kg.  
How many cakes can be made?

**4**

A milk shop has 8 liters of milk. Each bottle holds  $\frac{1}{2}$  liter.  
How many bottles can be filled?

**16**

A chocolate bar weighs 2 kg. Each piece is  $\frac{1}{8}$  kg.  
How many pieces can be made?

**16**

A vegetable shop has 7 kg of carrots. Each bundle is  $\frac{1}{7}$  kg.  
How many bundles can be made?

**49**

Noah has 9 meters of ribbon. Each gift needs  $\frac{3}{4}$  meter.  
How many gifts can be wrapped?

**12**
